

PROJECT REFERENCE  
INTRODUCTION OF AN APPLICATION  
PORTFOLIO MANAGEMENT SYSTEM

**RESULTS & BENEFITS**

Improved decision making and highly efficient information management based on streamlined business application portfolio. Stakeholders are committed and empowered to maintain a high level of data quality. Thus, accelerated regulatory processes and compliance to GxP requirements.

**CUSTOMER**

Global pharmaceutical company, headquarters in Denmark

**CHALLENGES**

Our customer had no overview of business application portfolio available. We took this as an opportunity to evaluate current applications and implement a global, yet locally managed, inventory of all GxP-relevant computer systems.

**APPROACH**

Introduction of a customized web-based eclipse framework application portfolio management system from specification and design to implementation and global rollout. Implementation of approval and update workflows for application data and GxP-relevant IT system inventory. Validation of the new solution.

**FACTS & FIGURES**

9 months | 3 consultants

**QUDITS ROLE**

Project management | Platform qualification and application validation | User training | Organizational communication and change management
